EDUCATION

Phd Data Science (AI/ML) **Continue**
Superior University Lahore
1st Semester
Jan 2026 - Nov 2028

MS Data Science (AI/ML)
Abasyn University Islamabad
Cumulative GPA: 3.12/4.0
Relevant Coursework: Machine Learning; Artificial Intelligence; Deep Learning; NLP
Jan 2020 - Mar 2023

WORK EXPERIENCE (4.6 Years +)

Senior AI Engineer (Computer Vision + Generative AI)
Gicoh (2.8 Years +) **April 2023 – Continue**

Projects

Generative AI Product " Real-Time Live Call Conversational Chatbot "

- ★ Created a **RAG System** with Llama3.2 LLM using FAISS embeddings
- ★ Use Google Speech-to-Text and Text-to-Speech module
- ★ Join this conversational chatbot with Elastix Phone Calls Server by creating a Python SIP client for Handling Live Calls

Multi-Agents Product " HighTribe (Travel Assistant and Tripe Advisor) attached with Google Map "

- ★ Implemented different LangGraph Agents for Internal Database, Google Map and External Web Search.
- ★ Used Gemini and ChatGPT, App is live on web also on Google/IOS App store

Gen. AI Product " Sentiment Analysis Agent of Sales and Support Team on their Calls"

- ★ AI Agent is created which fetch Recorded Call of Sales and Support Team from Elastix PBX Phone Calls Server

Healthcare AI Product "CareVision - Digital Health Care Management System"

- ★ Implement AI based Care Plan Generation
- ★ Voice Based Data Entry and Data Extraction

AI Multi-Agents RAG "Advance RAG with LightRAG (Neo4j GraphDB) and Azure Documents Intelligence "

- ★ Created a MultiAgent System using **LangGraph**
- ★ Used Hybrid techniques for all types of documents
- ★ For Excel and CSVs LightRAG + SQL are used for Data extraction
- ★ For other documents (Pdf,docs,txt) Azure documents intelligence + LightRAG (for entities and relationship extraction) are used

Computer Vision Product " Employee Counting with Tracking from Live CCTV Camera Feed "

- ★ Completed this Product in Fast API Framework with Yolov8
- ★ Implement Live Employee Counting and Tracking using **Deep Sort** Algorithm using RTSP Camera Stream with Face Recognition

AI Agents Product " CRM/ ERP Data Extraction Agent "

- ★ This Product is under development
- ★ LangGraph Agent is created with Custom SQL Tool which fetch the Data from ERP DataBase with Humanize Query

AI Engineer (Computer Vision + Generative AI)

Techling (1.9 Years) **June 2021 – April 2023**

★ **Completed End to End AI Product " Chex.AI " (Vehicle Inspection through AI)**

- Developed Completed Fast API Framework including AWS Authentication Modules for data fetching and uploading after preprocessed from AI Model
- Implemented License Plate Number Extraction through Yolov8 Model
- Implemented Vehicle Damage Detection Using Fine-Tuned Yolov8
- Implemented Video Object Tracking (Detection of Damages in live Video)
- Implemented "**Pixtral**" LLM with Damage Detection Predicted Message

★ **Completed End to End Gen. AI Product " DeftGPT " (Multiple LLMs in one APP)**

- Developed Complete Fast API for this Generative AI Product and deployed on AWS
- Setup in 11 differents LLMs (APIs) in one platform **" DeftGPT "** user can choose our own choice LLM at same time on same platform and also can get multiple Models Response on same Question

★ **Completed End to End Generative AI " RAG System " for School Exams Management System**

- Implemented **MCQs** Generated system from Given Pdf Book
- Integrate **Llama 3.1** in it for human like conversational response
- User just write topic name and get MCQs related to that topic with Correct Answer

★ **Completed End to End Conversational Chatbot for Online Ticket Management**

- Attach Llama 3.1 with Tickets and Buses Information Database (PostgreSQL)
- Chatbot load db itself and conversate with user through (Voice and Typing) to book a ticket and then also update the dataset in Database

Internship in Data Science

Programmer Force Lahore (3 Months) **March 2021 – June 2021**

★ Engage in hands-on exploration and experimentation with AI technologies, contributing to the development and enhancement of machine learning models, algorithms, and applications under the guidance of experienced mentors.

★ Collaborate with cross-functional teams to gather and analyze data, conduct experiments, and provide insights to support the implementation and optimization of AI solutions in real-world scenarios.

Certification

Machine Learning Specialization
Coursera (Stanford University, DeepLearning.AI)
Master fundamental AI concepts and develop practical machine learning skills in the beginner-friendly, 3-course program by AI visionary Andrew Ng.

Trainee Data Science
Programmer Force Lahore March 2023 – June 2023

★ Engage in hands-on exploration and experimentation with AI technologies, contributing to the development and enhancement of machine learning models, algorithms, and applications under the guidance of experienced mentors.

ADDITIONAL

Skills: RAG System, LLMs, Custom Fine Tuning, Object Detection (Yolo), Object Tracking, Face Recognition, Stable Diffusion Models, AI Agents, LLM, Chatbots, STT, TTS, LighRAG, GraphRAG, Neo4j GraphDB, LORA etc .
Development Framework: Fast API, LangGraph, Flask, Django, LangChain, CrewAI, AutoGPT, PhiData, Azure AI Foundry and MCP etc.
